

## Flashback Arrestor & Check Valve FR 20 Ox & Ac For X21

**Item No.: 361361215**

### Product information

Set of flashback arrestors for Oxygen and Acetylene with 6mm hose socket to use at the cutting torch handle in order to prevent backflow of gas or backfire.

### Safety

We strongly recommend annual testing of the flashback arrestors, and to replace them every 5 years, for safety reasons based on the COSWP UK (BCGA CP7), OCIMF SIRE and RIGHTSHIP RISQ requirements.

### Features

- Non return valve (NV) to prevent reverse flow of gases.
- Conform to EN 730-1.
- Sintered flame arresting element (FA) to quench flashback.

### Benefits

- Marking of manufacturing date for OCIMF SIRE / RIGHTSHIP RISQ compliance.
- Offers higher level of safety protection at the torch, close to welder especially used on long gas hose line on top of the flashback arrestors installed at gas regulator on cylinders.

### Specification

<b>General:</b>	Invent Hazard Material (IMO/EU) classification	NA
