

Regulator 510 Ar/CO2 Flow 0-35L/Min

Item No.: 211213411

Product information

Supplies a steady stream of shielding gas to the torch and reduces cylinder pressure to suitable working pressure. Gas regulators should be replaced with maximum 5 years intervals as a rule, because internal seals and membranes will deteriorate with time. Faulty, old or corrodes regulators should be replaced and repairs should never be attempted on them.

Features

- Provides constant flow of gas at correct pressure
- Safety valve
- Comes with hose connections for ¼"
- Built according to international norms

Benefits

- No need for adjustment during work
- Provides safe working conditions
- Connects to all standard hose dimensions
- Long lasting quality

Specification

General:	Invent Hazard Material (IMO/EU) classification	NA
-----------------	---	-----------

Dimensions/ Weight	Connection [size/type]	W24.32 x 1/14"	Technical date	Burt pressure [bar]	60 bar minimum
				Inlet pressure [bar]	200 maximum
				Operating pressure [bar]	20 bar maximum
				Safety outlet opening pressure [bar]	7.8
				Test pressure [bar]	40 bar
